

THE WORLD'S
STRONGEST DENIM

Important information

Paris, 23 February 2026 - Dear customers and partners,

As of January 1st, 2026, the industrial collaboration between Armalith® and Royotec (Tejidos Royo S.L.) has ended. We thank Royotec for its contribution to Armalith®'s development.

From this date, fabrics manufactured by Royotec are no longer marketed under the Armalith® brand. However, orders placed after January 1st, 2026 for fabrics officially pre-qualified in 2025 may still benefit from certified Armalith® labels, provided approved technical specifications are strictly respected.

During this transitional phase, the 5% royalty is settled directly with PHP prior to label issuance, ensuring continuity and control; under the forthcoming global platform, royalty collection will again be integrated at mill level. Certified jacquard labels and hangtags remain invoiced at production cost.

Since 2024, Armalith® has been structuring a broader international manufacturing platform. Next-generation fabrics, presented with strong industry interest at EICMA 2025, are completing final validation and certification.

The new platform will be introduced progressively during the first semester of 2026. Partners wishing to receive priority sampling access are invited to contact us

Pierre-Henry Servajean
